Physical Security Solutions

Gun Cabinets and Safes

ISSUE 1 | 2022

Burton Safes was founded in 1990, is part of the Trusted Security Group and operates from two main premises. There are offices & warehousing in Brockholes, near Huddersfield & offices, engineering and fabrication in Kirkstall, Leeds. We Champion the use of independently tested and certified products from well-known and reputable institutions such as ECB-S, VdS, SBSC, ICIM, Sold Secure, Secured by Design and the British testing and certification body LPCB.

Product quality is taken very seriously. Burton Safes holds an ISO9001 certificate and has rigorous quality measures in place. European tested products are also subject to further inspections both internally and by external auditors. The Group is an active member of various trade bodies including British Safe & Vault Trade Association (BSVTA), Secured by Design, ATMIA, Eurosafe, ESSA, BSI, AiS and the Master Locksmiths Association (MLA).

A Guide to Secure Firearms Storage

The conditions of a firearm or shot gun certificate stipulate that guns must be stored securely to prevent access by an unauthorised person as per the Firearms Rules 1998. It is an offence not to comply with these conditions. In most cases this can be achieved by specifying a gun cabinet or safe that is constructed to conform to the British Standard BS7558:1992.

THE HOME OFFICE HAS ISSUED guidance for storing firearms, ammunition, and easily removable component parts such as rifle bolts etc, but the Police will look at the circumstances of each case and at the overall security arrangements, including the security of the premises where the firearms and ammunition are kept.

Generally, the Police will consider three security levels when issuing a license.

Level 1

In most cases the use of a suitable security certified gun cabinet or safe that conforms to the British Standard BS7558:1992 will be acceptable.

Level 2

Where extra security is required due to being in a high crime rate location or where other Police considerations are applied, doors may need fitting with locks to meet BS3621 standards, intruder alarm installed covering the gun storage location, a higher-grade gun cabinet or safe and even reducing the risk by using more than one security gun cabinet or safe.

Level 3

For the highest risk multiple gun safes made to higher security levels may be requested and more advanced certified alarm systems and security doors needing to be put in place before issuing the certificate.

Burton Safes

Our expert team can help you every step of the way. Physical Security Solutions is our business. We provide premium security gun safes, high security doors and vault rooms to protect your valuables.

Sold Secure updates it's Firearms Cabinets Specification

With firearms and approval of licences in the news during 2021 readers may be interested in the announcement from Sold Secure on the level of certified cabinets.

Whilst BS7558:1992 has been around for a while, seeing as it is a relatively low level of testing for such an important area, Sold Secure engineers worked with colleagues at Secured by Design to re-develop it's Sold Secure specification SS302 which now at Bronze level equates directly to BS7558:1992, but at Silver and Gold encompasses BS7558:1992 testing but takes steps further to make for higher security cabinets.

Sold Secure are delighted to have seen a quick adoption of the specification with Burton Safes being the first to have products approved to all three levels, Bronze, Silver, and having the only Gold approved gun safe on the market.

The Burton Gun Cabinets and Safes Range

To help with specifying the correct level of security protection, at Burton Safes we offer a range of gun cabinets and safes that not only meet BS7558:1992 standards but are also tested and certified for securing cash and valuables with the Warden LFS Gun Safe also providing a level of fire protection.

Pioneer Gun Cabinet

- Tested and certified to Firearms cabinets SS302:2020 Bronze by Sold Secure
- Police Preferred Specification – Secured by Design

Warden LFS Gun Safe

- Tested and certified to Firearms cabinets SS302:2020 Silver by Sold Secure
- Police Preferred Specification – Secured by Design
- Independently security tested to EN1143-1 and fire tested to EN15659 by IMP

Gamekeeper Gold Gun Safe

- Tested and certified to Firearms cabinets SS302:2020 Gold by Sold Secure
- Police Preferred Specification – Secured by Design
- Independently security tested to EN1143-1 by ECB-S
- Insurance approved by the AiS

The Burton Warden LFS and Gamekeeper Gold gun safes are now available with the Burton Duo Fingerprint safe lock.

Ammunition Safe

 **Cash Rating**
£4,000

 **Jewellery Rating**
£40,000

Size 3

The National Rifle Association (NRA) recommends that guns be stored unloaded until you need to use them. Keep your ammunition in a locked safe that is separate from your gun safe. Storing your ammunition away from your guns will lower the risk of your child or other family members putting the ammunition into the gun.

- Independently tested and certified to EN14450 S2 by ECB-S
- Insurance approved by the AiS
- Built to a Police Preferred Specification - Secured by Design
- Ideally suited for storing ammunition
- Suitable for pistols and accessories to keep them secure
- Option of key or electronic locking in all sizes
- Electronic lock features 1 master code and 9 user codes with dual user and time delay functions
- Removable shelf in size 3, height adjustable shelving in sizes 4-6
- Back and base fixing

Embassy Modular Security Rooms

Our High Security modular rooms and walling systems combined with a choice of armoured high security doors provide the perfect solution for building secure rooms to protect valuables, critical data or create custom designed safe rooms to protect your family.

With over 30 years experience designing physical security solutions for banks, cash in transit companies, ATM deployers, safe deposit centres and the largest retail companies, we are one of the few UK security companies that can offer the full Turnkey service in-house with our own R&D, CAD, design and manufacturing team, surveyors, dedicated project managers and fully trained installation engineers.

Your privacy and security matter to us...

Tailor made to meet our client's budget, installation deadlines and provide the highest possible protection, we can design and build a stand-alone room solution for any building or retro fit within an existing room where weight and space are normally an issue.

Our Embassy Modular Security Rooms are typically designed for:

- Private Residences
- Schools
- Hotels
- Offices
- Embassies
- Jewellers
- Listed Buildings
- Healthcare
- Pharmaceuticals and Laboratories
- Warehousing
- Arts and Museums
- Luxury and High Value Goods
- Critical National Infrastructure
- Data Centres
- Military
- Gun Storage
- Retail
- Utilities
- Nuclear
- Battery Storage
- Transport
- ATM Rooms and Banking
- Safe Deposit Centres
- Cash Handling

For larger commercial secure storage please see our range of Transportable Strongrooms, the freestanding Orthrus Strongroom certified by LPS to F10 G5 (SR6) and our larger freestanding Cerberus vaults certified to EN1143-1 Grades 1 to 13.

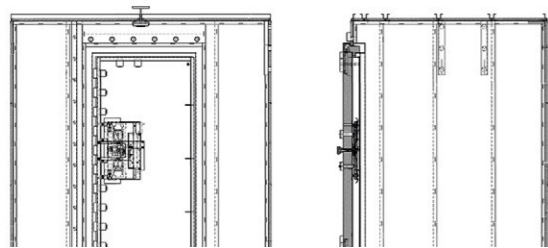

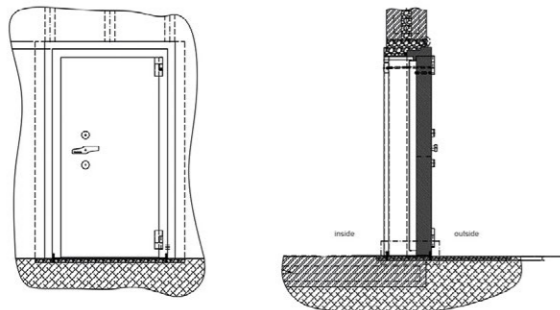

Orthrus Strongrooms

A free-standing high security solution of modular construction, Orthrus delivers optimum price/performance ratio. It is certified to the very latest LPS standard – LPS1175: Issue 8 and has achieved security rating F10 (SR6) G5. Each room is built to order according to the individual size and security requirements of the client. The flexibility of design and build allow this to be the perfect solution in the commercial world for high value items or indeed military/government use for sensitive materials or meeting spaces.

Locking Options

- Free-standing high security safe room
